## Fun in the sun – water safety

Warm weather brings out all the fun when you're staying cool in the pool! Drowning is a leading cause of death in children ages 1 to 4, and a top cause of death in teens, according to the American Academy of Pediatrics. Whether it's a small inflatable pool, a large above-ground pool, an in-ground pool, or a nearby pond, danger is present. Make it a priority to stay informed and teach your children about water safety.

### Here are some safety tips:<sup>1</sup>

- Pools should have a fence surrounding all sides with a locked gate.
- Large inflatable pool toys are very enticing to young children. Keep these out of the water and secured when not in use.
- Only swim where there is a lifeguard on duty.
- Closely supervise children and poor swimmers.
- Swim with a buddy. Always stay with your buddy.
- Enroll in swim lessons for children and adults.
- Avoid substance use when supervising children near water.
- As the supervising adult, avoid distractions.
- Wear a life jacket.
- When your watch is up, make sure another adult will take it on.
- If a mistake happens, it can cost a life. Take a cardiopulmonary resuscitation (CPR) course and keep the skill fresh.
