

# Diagnosis/Procedure Code Gender Guidelines

Reimbursement Policy ID: RPC.0031.7700

Recent review date: 02/2023

Next review date: 02/2024

*AmeriHealth Caritas Ohio reimbursement policies and their resulting edits are based on guidelines from established industry sources, such as the Centers for Medicare and Medicaid Services (CMS), the American Medical Association (AMA), state and federal regulatory agencies, and medical specialty professional societies. Reimbursement policies are intended as a general reference and do not constitute a contract or other guarantee of payment. AmeriHealth Caritas Ohio may use reasonable discretion in interpreting and applying its policies to services provided in a particular case and may modify its policies at any time.*

*In making claim payment determinations, the health plan also uses coding terminology and methodologies based on accepted industry standards, including but not limited to Current Procedural Terminology (CPT®), the Healthcare Common Procedure Coding System (HCPCS), and the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM). Other factors that may affect payment include but are not limited to medical record documentation, legislative or regulatory mandates, a provider's contract, a member's eligibility in receiving covered services, submission of clean claims, and other policies. These factors may supplement, modify, or in some cases supersede reimbursement policies.*

*This reimbursement policy applies to all healthcare services billed on CMS-1500 forms or its electronic equivalent and, when specified, billed on UB-04 forms or its electronic equivalent.*

## Policy Overview

This policy addresses the application of gender edits when diagnosis and procedure code(s) are reported inappropriately for the member's sex. Diagnosis and/or procedure gender conflicts will be considered billing errors and will not be reimbursed.

## Exceptions

Use of the modifier -KX with condition code 45 on a claim may result in reimbursement when there is a gender conflict service.

## Reimbursement Guidelines

Some ICD-10-CM diagnosis codes apply to only female or only male patients. The coding books may denote the gender of a diagnosis with a male ♂ or female ♀ symbol. Additionally, some codes may include the word "male" or "female" in the diagnosis description, while others apply to male or female because of gender-

specific terms such as prostate, testes, ovary, vagina, etc. Similarly, ICD-10-PCS and CPT codes may be specific to the sex of the patient at birth, for example, hysterectomy and vasectomy.

Claims submitted with diagnosis/sex conflict or procedure/sex conflict will not be reimbursed.

## Definitions

### Diagnosis Code

A diagnosis code is one that is defined as currently active per the ICD-10-CM manual. They are composed of codes with 3, 4, 5, 6, or 7 alpha-numeric characters. A diagnosis code is invalid or incomplete if it has not been coded to the full number of characters required for that code, including the 7th character, if applicable.

### Diagnosis Age and/or Gender Consistency

Diagnosis age and/or gender consistency refers to selecting diagnosis codes, which by definition or nature of the diagnosis, are consistent with age, age group, or gender of the patient for whom they are being reported.

**Modifier:** A one or two-character code used to indicate that a service has either been altered in some way or that a significant circumstance surrounds that service and that this information needs to be taken into account for claims processing.
