

Transform Your Performance Through Optimal Data Sharing

Supplemental Data Options For Providers

Transform Your Performance Through Optimal Data Sharing

EPIC Payer Platform

Real-Time Clinical Data Access

The platform enables seamless, real-time access to clinical data within Epic EMRs, improving provider efficiency and workflow.

Streamlined Clinical Processes

Key processes like prior authorizations and care management are streamlined, reducing manual tasks and provider abrasion.

Automated Data Exchange

During peak seasons, the platform automates data exchange to reduce administrative burden on healthcare teams.

Operational Efficiency and Collaboration

Providers benefit from operational efficiencies and collaborate with leading health systems and AmeriHealth to improve outcomes and productivity.

Transform Your Performance Through Optimal Data Sharing

Aggregator (E.G. Ellkay)

Simplified Onboarding

Aggregators provide prebuilt adapters and standard methods for easier integration with major EHR systems.

Daily Data Exchange

Platforms support daily CCD data exchange and validation essential for accurate healthcare reporting.

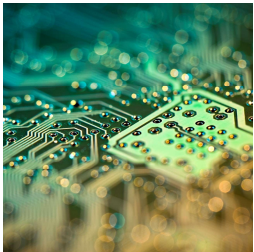

Security and Compliance

ELLKAY is HITRUST certified and complies with NIST and HIPAA ensuring secure and private data handling.

Efficient and Affordable Implementation

Automated medical record retrieval reduces manual effort and requires minimal IT and clinical team involvement and is provided to you at **NO COST.**

Flat Files

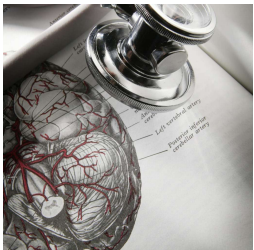

Low-Tech Data Solution

Flat File method offers a simple option for providers with limited IT resources to submit structured data easily.

Standardized Data Format

Using standardized formats ensures consistent, usable data for quality reporting and care gap analysis.

Minimal Workflow Disruption

Flat File method allows quick implementation with minimal impact on existing workflows.

Transform Your Performance Through Optimal Data Sharing

Direct EMR Access

Flexible Data Access

Direct EMR Access supports providers without standard systems by enabling manual chart reviews and data pulls.

Supports Unique Workflows

This method adapts to customized provider workflows, allowing effective data sharing without advanced integration tools.

Controlled Data Sharing

Providers maintain oversight of shared data, ensuring quality measurement and coordination efforts remain supported.
